Bill,

I never could find Wendy's fax number. Attached is my latest communication with **USPTO** and a **Power of Attorney** I transferred to Wendy in case she needed to contact the patent office about **EBA**.

This gentleman I wrote to is the supervisor of the other guy who's been handling my case for nearly 4 years. He has admitted the time line, even for patents, is abnormal and apologized stating that he would attempt to put **EBA** on "fast track" to finally reach conclusion.

I've just now started to promote both **EBA** and the nomenclature "**The Thinking Cap**" on the Internet. We will offer "licensing" possibilities.

After talking with several folks at **USPTO**, former inventors and current staff, I have no doubt there has been/continues to be an attempt to sabotage the approval of "**electromagnetic brain animation**". Someone did call an attempt to talk with an examiner about the potential benefit of the invention and divulge some '*background*' on its inventor. Except under special circumstances that, of course, is illegal. The unknown entity is either a government agency or a major corporation that is building something similar but is aware that **EBA** will trump whatever they have. Either way I was unable to determine how far they got or how influential they were.

As I've stated before, the potential of this mechanism is huge and we might have to fight to keep it from being stolen.

Bill

Email: BehaviorResearch@aol.com - Phone: 210-860-3655

April 2, 2007

Fax from - William Rogers - 210-408-1804 Fax to - Charles Mamor - 571-273-8300

USPTOAttention: **Charles Mamor** [Examiner Supervisor]

Called a couple of times and left messages. I can see by the "PAIRS" that some decent movement does seem to be taking place reference "**Electromagnetic Brain Animation**" [Application number **10627286**].

Just have a need to touch base and make sure this thing doesn't role off the track again. I know everybody thinks their invention is important; however, once this one "The Thinking Cap" gains access to the public domain the potential for positive benefit would be difficult to adequately explain.

Please let me know by *phone, fax or email* if or when there might be anything additional I can do to help expedite this situation to its successful conclusion.

Sincerely,

*Bill**William Rogers, Ph.D.*
